ORO-SOIL[®]

ACT 36/1947 REGISTRATION N^o

B4665 · FERTILIZER · GROUP II

SOIL IMPROVER

- Use as a soil application to improve the infiltration rate and drainage of water in soil.
- Improved infiltration of water in compacted soils results in lower penetration resistance and less restriction of root growth.
- Vertical and horizontal water distribution in soil is improved.
- Reduced hydrophobicity and improved water holding in sandy soils.

CONTENTS

Cold-Pressed Orange Oil

100g / litre
